  - Eye/Ear/Nose Drops
  - OTC/Vitamins/Minerals/Supplements
- Conclude Interview**

# THE 3-STEP MEDREC PROCESS

## 1. Generate a medication list

- current medications with name, dosage, route and frequency
- how patient takes the medications
- use at least 2 different information sources

## 2. Reconcile the list

- use the list to create orders or compare with what patient should take
- identify and resolve discrepancies

## 3. Share the list with the rest of the team

- record and share any medication changes and reason for change
- share with patient, family or caregiver and team of healthcare providers
