Some quotable moments from Kim's presentation

“There is always a reason for the behaviour”

“Put your mind in the mind of the other”

“Negative cues have priority in the brain”

The importance of “Gleaming and beaming”

“Attachment is built on a principle of Serve and Return”

“When it works it is treatment, and when it doesn't it is assessment”

“Movement i.e. heavy lifting (sensory), Mindfulness (cognition), and Relationships (emotion) are essential to addressing trauma”

Secure attachment, and communicating the following message is critical:

- “What's important to you is important to me”

Kim Barthel, an expert in neurobiology with 30 years of experience in occupational therapy and a world-renowned instructor will help you develop skills in sensory strategies when working with complex needs clients .
