

President's Excellence Awards – Quality Improvement Scoring Worksheet

QUALITY IMPROVEMENT – Individual and Team Award

This award recognizes an individual and a team who have made evidence-based quality improvements in the health system which achieved improved health outcomes for patients and their families and/or organization or clinical effectiveness. Clinical and non-clinical teams that have implemented or redesigned a system issue, process or aspect of care which achieved exceptional improvements can be nominated for this award.

The nomination must demonstrate:

- The challenge or opportunity the system, quality or process improvement was addressing
- The result achieved and what made the achievement exceptional
- How the improvement process engaged clients, patients and families
- How the improvement process achieved better health outcomes for patients and families
- How the results were measured with the supporting data
- How the team demonstrated leadership and collaboration with stakeholders and ensured sustainable improvement

1) Achievement:

How well did this nomination identify the challenge and/or opportunity that the system, quality or process improvement was addressing? How well was leadership and collaboration demonstrated to reach the desired result?

10	9	8	7	6	5	4-3	2-1
Preferred			Very Good			Good	Fair
<p>This nomination exemplified a high degree of explanation for the challenge and/or opportunity that was addressed and why it was important to improve.</p> <p>This improvement process exemplified a high degree of leadership and collaboration.</p>			<p>This nomination demonstrates to a moderate degree the challenge and/or opportunity that was addressed and why it was important to improve.</p> <p>This improvement process exemplified a moderate degree of leadership and collaboration.</p>			<p>This nomination demonstrated little to no degree for the challenge and/or opportunity that was addressed.</p> <p>This improvement process demonstrates little or no significant degree of leadership and collaboration.</p>	

2) Impact of Achievement:

How well were the desired results achieved and if so what made it exceptional? How well did this improvement process engage clients or patients and families?

10	9	8	7	6	5	4-3	2-1
Preferred			Very Good			Good	Fair
The desired results of this improvement process were exemplified in this nomination to a high degree with notably exceptional results while engaging with clients or patients and families which attributed to the success.			The desired results of this improvement process was moderately demonstrated with no exceptional reference and a moderate degree of engagement with client or patients and families.			The desired results of this improvement process demonstrated little to no significant results and had little to no degree of engagement with clients or patients and families.	

3) Alignment with AHS Values: Compassion, Accountability, Respect, Excellence, Safety:

How well does this nomination exemplify the AHS Values? What specific values are described in this nomination?

10	9	8	7	6	5	4-3	2-1
Preferred			Very Good			Good	Fair
This nomination exemplifies a high degree of alignment with the AHS Values describing linkages to the majority of the five values.			This nomination demonstrates a moderate degree of alignment with the AHS Values describing linkages with some of the five values.			This nomination provides little to no evidence that there is alignment to the AHS values.	

4) Sustainability:

How well did this improvement process embed measurement and supporting data to ensure results were evidence-based, effective and efficient? How does this improvement process ensure the results achieved are sustainable?

10	9	8	7	6	5	4-3	2-1
Preferred			Very Good			Good	Fair
This improvement process exemplified a high degree of embedded measurements and supporting data to ensure results were evidence based; effective, efficient and sustainable.			This improvement process demonstrates a moderate degree of measurement and supporting data with a moderate degree of sustainability built into a plan to maintain the results achieved.			This improvement process demonstrates little or no significant degree of measurement or supporting data for sustaining the results achieved.
