

Empowering patients through their journey

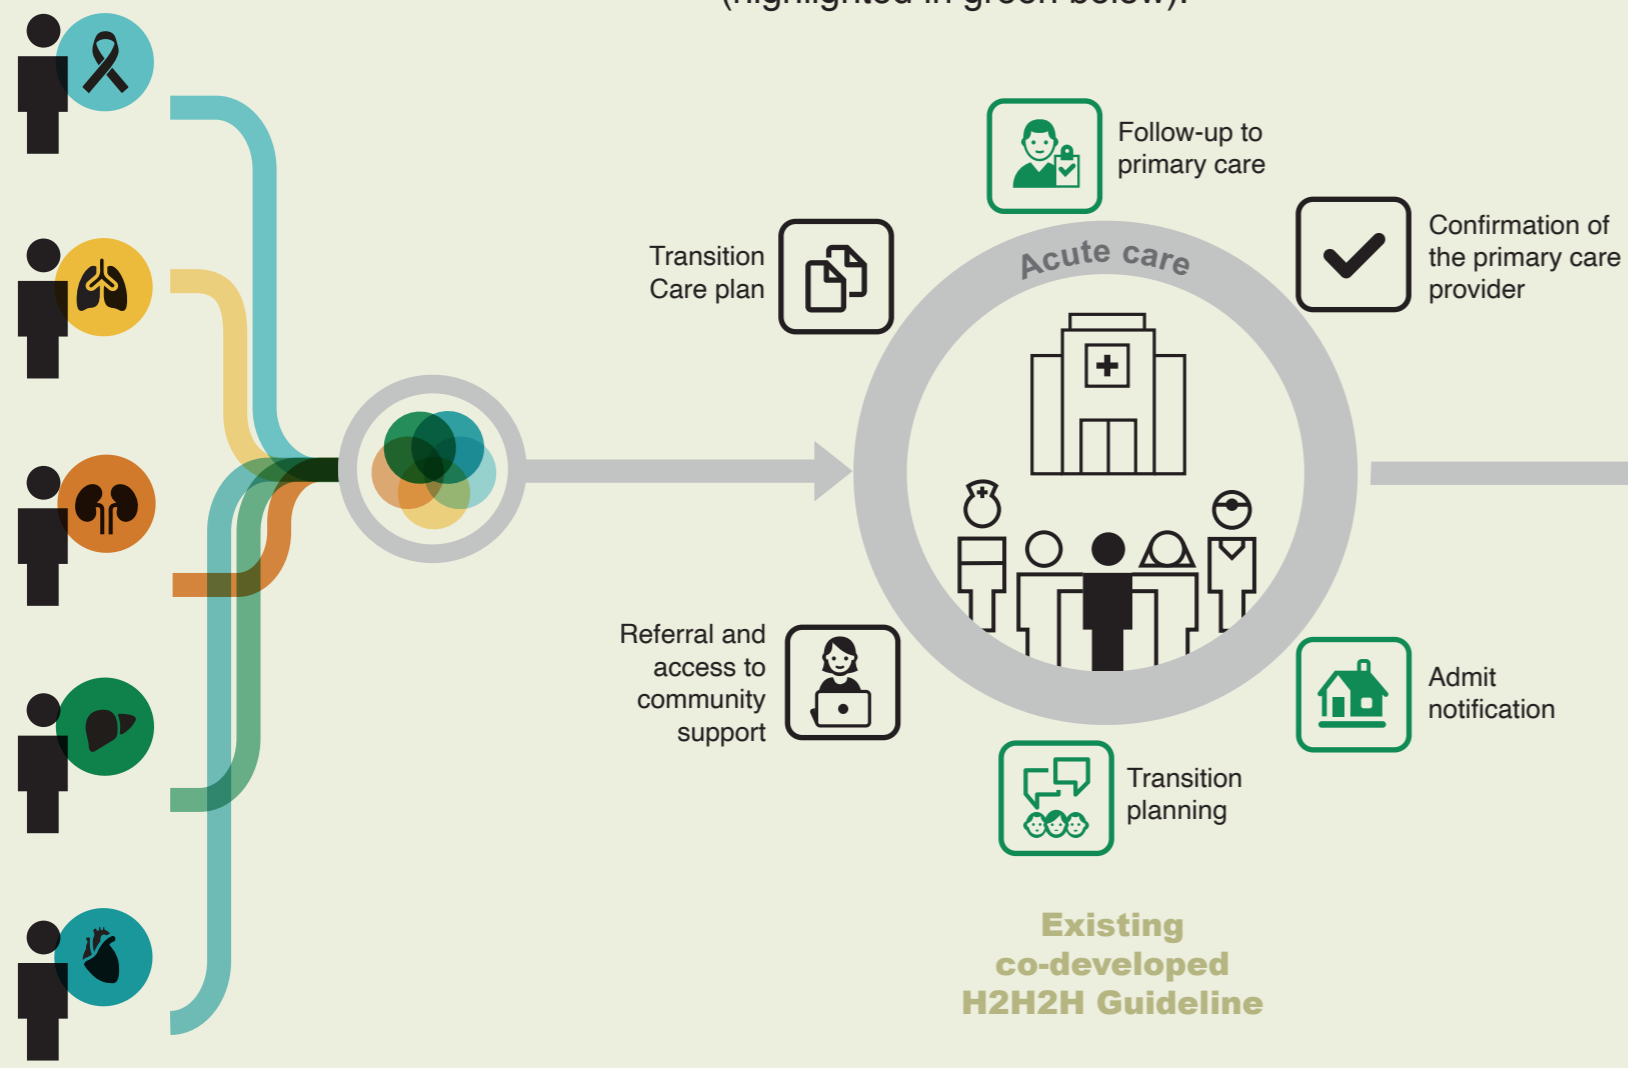

Pathway Solution:
Integrates disease-specific pathways and can be applied to patients with multiple diseases

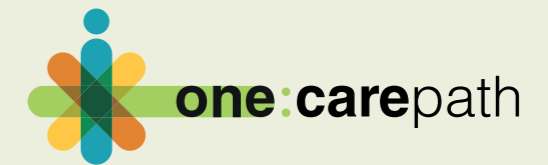

Home to Hospital to Home Transitions

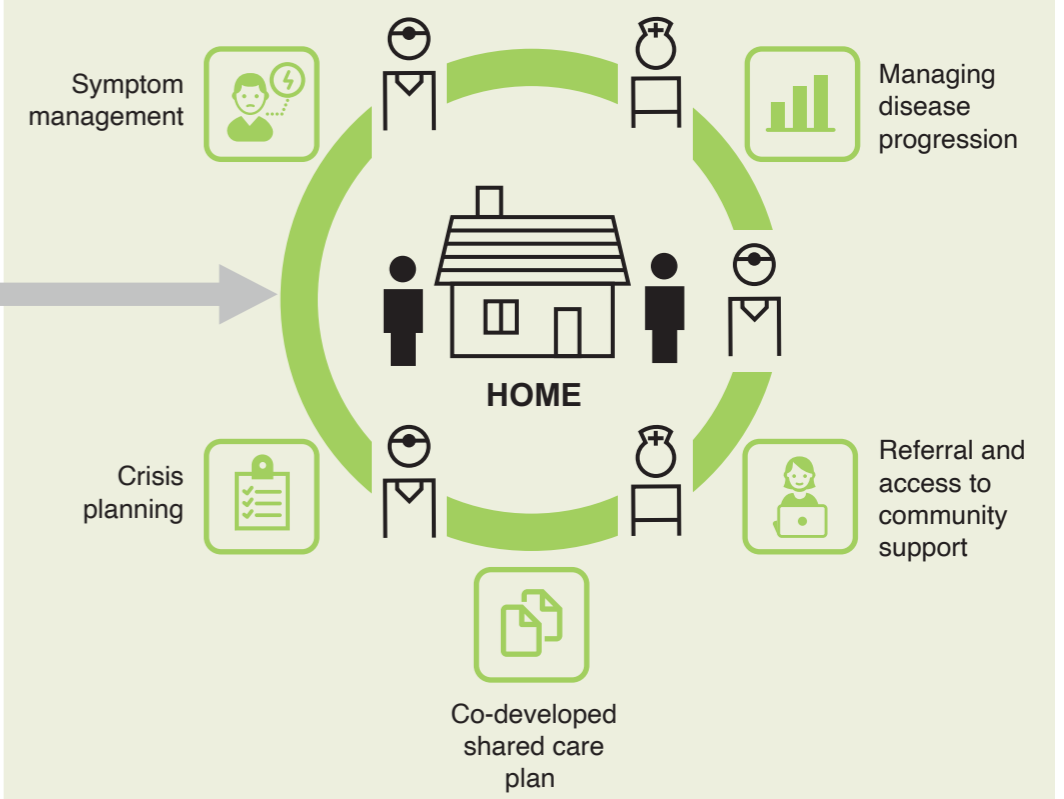

Focuses on 3 of the 6 elements in the H2H2H Transitions Guideline (highlighted in green below).

Patient's Medical Home

Shared-care between providers and patients to keep patients in their medical home.

- Improved patient and provider outcomes
- Increased efficiency in health system
- Reduced healthcare costs
