

Initial Outbreak Data Requirements for ILI / GI Outbreaks

Acute Care WHS / OHS

This document is intended to guide WHS / OHS in collecting and reporting staff outbreak data. Once all data is available, WHS / OHS should page the outbreak pager at 780-445-7226 to review with Public Health Staff. Alternately, this document can be faxed to 780-342-0248 (ILI outbreaks) or 780-735-1801 (GI outbreaks).

OHN name and contact number:

EI number:

Hospital name:

Unit affected:

Date this report submitted:

How many staff members (total) work on this unit? **Note: This should be the staff at risk population (not just the number of staff per shift). Sites should have a consistent, facility-wide criteria for how to determine the staff at risk population. WHS / OHS to determine criteria for what constitutes the staff at risk population.**

Are there any staff members with case defining illness? If so, what are their onset dates? **Note: Public Health only requires aggregate data for staff, so staff demographics (name, DOB, etc.) not required.**

	Onset date
Staff #1	
Staff #2	
Staff #3	
Staff #4	
Staff #5	
Staff #6	

Note: If more than 6 staff members become ill, please attach a second sheet.

FOR INFLUENZA OUTBREAKS ONLY: What is the staff immunization rate for this unit?
