

Description of Service

Alberta Health Services (AHS) Medical Staff who are specialists in Obstetrics and Gynecology (or its associated subspecialties) and have privileges in the Department of Obstetrics and Gynecology provide safe, high quality care for obstetrical and gynecologic patients in AHS facilities across the province. The specialty encompasses medical, surgical, obstetrical and gynecologic knowledge and skills for the prevention, diagnosis and management of a broad range of conditions affecting women's gynecological and reproductive health. Working to provide a patient-focused, quality health system that is accessible and sustainable for all Albertans, the department also offers subspecialty care including gynecological oncology, reproductive endocrinology, maternal fetal medicine, urogynecology, and minimally invasive surgery.¹

Obstetrics and Gynecology privileges may include admitting, evaluating, diagnosing, treating (medical and/or surgical management), to female patients of all ages presenting in any condition or stage of pregnancy or female patients presenting with illnesses, injuries, and disorders of the gynecological or genitourinary system including the ability to assess, stabilize, and determine the disposition of patients with emergent conditions consistent with medical staff policy regarding emergency and consultative call services. Providing consultation based on the designated position profile (clinical; education; research; service), and/or limited Medical Staff activity including providing assistance with surgical procedures or extender activity for required obstetric and gynecological service coverage may also be requested and included.

Zone Medical Staff Organization

Zone	Department(s)	Section(s)
South	Obstetrics & Gynecology	Generalist
Calgary	Obstetrics & Gynecology	Generalist Gynecological oncology* Maternal fetal medicine* Minimally invasive gynecologic surgery (migs) Reproductive endocrinology & infertility* Urogynecology Pediatric Gynecology
Central	Obstetrics & Gynecology	Generalist
Edmonton	Obstetrics & Gynecology (Women's health)	Generalist Gynecological oncology* Maternal fetal Medicine* Reproductive endocrine & infertility* Urogynecology Minimally invasive gynecologic surgery (migs) Pediatric Gynecology
North	Women's Health	Women's Health

¹ Royal College of Physicians and Surgeons of Canada – Objectives of Training in the specialty of Obstetrics and Gynecology 2013.

* indicates Royal College of Physicians and Surgeons of Canada Subspecialty Training Required

College of Physicians and Surgeons of Alberta (CPSA) Requirements

The CPSA grants practice permits but does not guarantee that an individual will be granted an AHS Medical Staff appointment or privileges. It is AHS's role and responsibility to screen and evaluate the qualifications of Practitioners in relation to the specific procedures and patient care services they will be providing at specific sites before granting an appointment and clinical privileges.

Physicians with expertise in a particular area of practice may require CPSA approval separate from the CPSA licensure and AHS privileging process for specific services. These services typically fall into the non-invasive diagnostics group. Please refer to the CPSA website for a list of practice areas requiring approval

<http://www.cpsa.ca/accreditation/physician-approvals/>.

Minimum Education and Training Requirements:

1. Appropriate licensure with the College of Physicians and Surgeons of Alberta,
AND
2. Credentials satisfactory to the Zone Clinical Department Head (ZCDH), Zone Application Review Committee (ZARC) and/or the Chief Medical Officer (CMO), including:
 - Successful completion of a Royal College of Physicians and Surgeons of Canada (RCPSC) accredited residency program and fellowship in the RCPSC (FRCPC); OR
 - Equivalent international training and certification satisfactory to the ZCDH, ZARC and/or CMO.

These are minimum requirements. The ZCDH, ZARC and/or the CMO may determine that additional education, training or experience is required. The ZCDH, ZARC and/or CMO may also determine that an individual has developed competency in a particular area, without having completed a fellowship, through an equivalent combination of education, training and experience. In addition to the minimum requirements listed above, additional education, training and experience may be required at the discretion of the ZCDH, ZARC and/or the CMO, to grant certain clinical privileges. These specifics are reflected in the following list. Whether a particular combination of education, training and experience meets the requirements will be determined by the ZCDH.

Privileges Requiring Additional Education, Training and Experience

The list identifies privileges that require additional specialty training and documentation of

evidence that the practitioner has received recognized postgraduate education, training or an appropriate level of experience to safely provide the service.

Clinical Privilege List and Medical Staff Bylaws

The AHS Medical Staff Bylaws state that the clinical privileges granted to a Practitioner “define the diagnostic or therapeutic Procedures or other Patient care services a Practitioner is deemed competent to perform, the Facility(ies) and Zone(s) within which the Practitioner is eligible to provide care and services to Patients; and the specified AHS Programs and Professional services...that the Practitioner is eligible to access.”²

No recommendation on Clinical Privileges is meant to prevent any licensed Practitioner from performing any medical procedure on any person in an emergency situation where failure to perform that procedure may result in death or serious injury or harm to the person.³

Nothing in this document or the attached List of Obstetrics and Gynecology Clinical Privileges replaces the processes or requirements set out in the AHS Medical Staff Bylaws and Rules. This document and its attachments are intended to supplement and more fully describe the application of the AHS Bylaws and Rules in the context of Obstetrics and Gynecology Clinical Privileges.

The AHS Medical Staff Bylaws and Rules can be found on the AHS website at <http://www.albertahealthservices.ca/7086.asp>.

Interpretation of the Clinical Privilege List

This Clinical Privilege list was developed with consideration given to the Royal College of Physicians and Surgeons of Canada’s Competency Based Medical Education model. The following list describes and reflects the categories/types of patient services included in the scope of Obstetrics and Gynecology privileges available to members of the AHS Medical Staff with the necessary and required education, training and experience. When granted, Obstetrics and Gynecology privileges includes to perform the noted procedure using various techniques and approaches as appropriate for the patient, unless a specific technique or approach is specified. The Zone Clinical Department Head’s recommendation regarding specifics of an individual’s privileges and any associated techniques will be provided to ZARC and the CMO for their consideration.

The Medical Staff Rules define the minimum review period for the privilege list⁴.

² AHS Medical Staff Bylaws 3.0.2

³ AHS Medical Staff Rules 3.4.3(e)

⁴ AHS Medical Staff Rules, 3.4.3(f)(ii).

Sites of Clinical Privileges

A delineation of the sites of clinical activity is a required component of clinical privileges (AHS Medical Staff Bylaws, 3.2.1(c) and 3.2.7). Clinical privileges will reflect the site (or sites) where the Physician physically provides the clinical services. A Physician privileged in the specialty may have clinical privileges at multiple sites if they travel to multiple sites to provide clinical services as approved by the ZCDH, ZARC and/or the CMO. Privileges may only be granted at the site(s) and/or setting(s) that have sufficient space, equipment, staffing, and other resources required to support the privilege.

	Site A	Site B	Site C	Site D	Site E
Privilege 1					
Privilege 2					
Privilege 3					
Privilege 4					

The table above indicates what privileges are available at which sites:

- Privilege 1 is available at all sites
- Privilege 2 is available at sites A, C,D and E
- Privilege 3 is available at sites A and C
- Privilege 4 is available at sites B, D and E

Proctoring Requirements

The Zone Clinical Department Head may determine that a period of proctoring is required in certain situations. Proctoring can be defined as...:

“The term *proctor* is often used to mean observe, supervise, mentor, monitor, or directly assess...*proctoring* reflects a process by which an individual is reviewed and evaluated over time to ensure competence, and proctor identifies the person performing the assessment.” *The Medical Staff Handbook, A Guide to Joint Commission Standards, Second Edition.*

“Proctoring is a process of direct observation that allows for the focused evaluation of current physician competency in carrying out actual clinical care and takes both cognitive and procedural abilities into account. If the proctor observes potential or imminent patient harm during the proctoring process, it may be ethically appropriate for him or her to intervene.

”*Proctoring and FPPE: Strategies for Verifying Physician Competence, Second Edition.* Robert J. Marder, MD, CMSL, and Mark A. Smith, MD, MBA, CMSL.

OBSTETRICS GENERALIST	
Royal College of Physicians and Surgeons of Canada specialty training in Obstetrics and Gynecology or a combination of education, training and experience satisfactory to the ZCDH, ZMD and CMO is required.	
<input type="checkbox"/>	Admitting Includes; assessment, evaluating, consulting, diagnosing, treating (medical/surgical options) and surgical assistant privileges.
<input type="checkbox"/>	Consultation Includes; conduct history and assessment for the purpose of making recommendations related to care and treatment.
<input type="checkbox"/>	Surgical Assistant At the direction of the surgeon, provides aid in technical functions in the OR.
Clinical Privilege	
<input type="checkbox"/>	Wound care management
<input type="checkbox"/>	Vaginal delivery
<input type="checkbox"/>	Vaginal delivery of multiple gestation
<input type="checkbox"/>	Vacuum extraction (low/outlet)
<input type="checkbox"/>	Vacuum extraction (mid)
<input type="checkbox"/>	Forceps delivery (mid/low)
<input type="checkbox"/>	Mid-cavity rotation forceps delivery
<input type="checkbox"/>	Episiotomy and repair
<input type="checkbox"/>	Repair of perineal and vaginal tears, including third and fourth degree tears and cervical lacerations
<input type="checkbox"/>	Evacuation of the pregnant uterus by suction or Dilatation and curettage, less than 14 weeks (TA)
<input type="checkbox"/>	Evacuation of the pregnant uterus by Dilatation and evacuation, greater than 14 weeks (TA)
<input type="checkbox"/>	Evacuation of the pregnant uterus, curettage following vaginal delivery for retained products
<input type="checkbox"/>	Manual removal of the placenta
<input type="checkbox"/>	Cesarean hysterectomy
<input type="checkbox"/>	Cesarean section (primary and repeat) including low transverse, low vertical or classical cesarean section
<input type="checkbox"/>	Repair of uterine rupture
<input type="checkbox"/>	Paracervical block and pudendal block
<input type="checkbox"/>	Non-surgical and surgical management of moderate and severe post-partum hemorrhage, including the use of uterine compression sutures
<input type="checkbox"/>	Cervical cerclage, elective and emergent
<input type="checkbox"/>	External cephalic version
<input type="checkbox"/>	Management of shoulder dystocia
<input type="checkbox"/>	Abdominal Cervical Cerclage (laparoscopy or Laparotomy)

GYNECOLOGY GENERALIST	
Royal College of Physicians and Surgeons of Canada specialty training in Obstetrics and Gynecology or a combination of education, training and experience satisfactory to the ZCDH, ZMD and CMO is required.	
<input type="checkbox"/>	Admitting Includes; assessment, evaluating, consulting, diagnosing, treating (medical/surgical options) and surgical assistant privileges.
<input type="checkbox"/>	Consultation Includes; conduct history and assessment for the purpose of making recommendations related to care and treatment.
<input type="checkbox"/>	Surgical Assistant At the direction of the surgeon, provides aid in technical functions in the OR.
Clinical Privilege	
<input type="checkbox"/>	Wound care management
Laparotomy-abdominal/open	
<input type="checkbox"/>	Total Hysterectomy: benign disorders or low grade cancer endometrial, such as; dysmenorrhea, endometriosis, gender dysphoria, menorrhagia, menopausal , post-menopausal, fibroids
<input type="checkbox"/>	Sub-total hysterectomy (benign disorders)
<input type="checkbox"/>	Uterine Myomectomy
<input type="checkbox"/>	Pelvic Surgery: endometriosis / infection / inflammation / adhesions
<input type="checkbox"/>	Ovarian Cystectomy (benign)
<input type="checkbox"/>	Salpingo-oophorectomy (benign or cancer)
<input type="checkbox"/>	Oophorectomy (benign or cancer)
<input type="checkbox"/>	Omentectomy (cancer)
<input type="checkbox"/>	Ectopic Pregnancy Surgery
<input type="checkbox"/>	Tubo-ovarian Abscess
<input type="checkbox"/>	Hydrosalpinges Surgery
<input type="checkbox"/>	Tubal ligation / salpingectomy
<input type="checkbox"/>	Fallopian Tubal Re-anastomosis
<input type="checkbox"/>	Retro-peritoneal lymph node dissection
Vaginal Entry or Approach	
<input type="checkbox"/>	Examination under Anesthetic
<input type="checkbox"/>	Vaginal hysterectomy
<input type="checkbox"/>	Vaginal salpingectomy
<input type="checkbox"/>	Vaginal salpingo-oophorectomy
<input type="checkbox"/>	Vulvar Abscess Management
<input type="checkbox"/>	Vaginal foreign body removal
<input type="checkbox"/>	Uterus / Cervix IUCD Insertion / Removal
<input type="checkbox"/>	Dilatation and curettage of the uterus
<input type="checkbox"/>	Cervix Cerclage

<input type="checkbox"/>	Cervix (erosion, ectropian, stenosis, polyp)
<input type="checkbox"/>	Cervix Colposcopy
<input type="checkbox"/>	Cervix Cone Biopsy
<input type="checkbox"/>	Laser for Cervix / vagina / vulva
<input type="checkbox"/>	Endometrial Ablation surgery / procedure
<input type="checkbox"/>	Endometrial evaluation (biopsy; hysteroscopy diagnostic or therapeutic)
Gynecological Endoscopy (hysteroscopy/laparoscopy)	
<input type="checkbox"/>	Hysteroscopy - Diagnostic
<input type="checkbox"/>	Therapeutic / Operative Surgery: sterilization/uterine septum/leiomyomectomy/ polyps/synechiae resection
<input type="checkbox"/>	Endometrial ablation surgery
<input type="checkbox"/>	Laparoscopic Surgery Diagnostic
<input type="checkbox"/>	Laparoscopic Total Hysterectomy with or without Mocerator
<input type="checkbox"/>	Laparoscopic Assisted Vaginal Hysterectomy
<input type="checkbox"/>	Laparoscopic Assisted ovarian cystectomy
<input type="checkbox"/>	Laparoscopic Assisted salpingo-oophorectomy
<input type="checkbox"/>	Laparoscopic Assisted oophorectomy
<input type="checkbox"/>	Laparoscopic Assisted ectopic pregnancy excision: linear salpingostomy/ salpingectomy
<input type="checkbox"/>	Laparoscopic Assisted endometriosis stage 1/2 pelvic surgery
<input type="checkbox"/>	Laparoscopic Assisted endometriosis stage ¾
<input type="checkbox"/>	Laparoscopic Assisted myomectomy
<input type="checkbox"/>	Laparoscopic Assisted cervical cerclage
<input type="checkbox"/>	Laparoscopic Assisted bilateral endometrioma >4cm
<input type="checkbox"/>	Laparoscopic Assisted lysis of adhesions
<input type="checkbox"/>	Laparoscopic Assisted sterilization
Other Procedures or Surgeries (some procedures are ambulatory – outpatient)	
<input type="checkbox"/>	Wound management / Dehiscence
<input type="checkbox"/>	Vulva procedures - Biopsy and or limited large excision
<input type="checkbox"/>	Labial cysts/ Hypertrophic Labia / labial or Vulvar Lesions
<input type="checkbox"/>	Simple Vulvectomy
<input type="checkbox"/>	Trachelectomy
<input type="checkbox"/>	Ultrasound guided drainage of ovarian follicles
<input type="checkbox"/>	Ultrasound guided drainage of ovarian cysts
<input type="checkbox"/>	Ultrasound guided drainage of paracentesis
Uro-Gynecology procedures (see Uro-Gynecology Section for complete list)	
<input type="checkbox"/>	Anterior Repair
<input type="checkbox"/>	Posterior repair
<input type="checkbox"/>	Enterocoele Repair
<input type="checkbox"/>	Vault suspension by uterosacral plication
<input type="checkbox"/>	Primary Incontinence Procedures: Stress Incontinence Management Retropubic mid-urethral sling “TVT “/ Transobturator mid-urethral sling “TOT

<input type="checkbox"/>	Limited Cystoscopy: for post-operative evaluation of sling placement, ureteric function, and bladder integrity after TAH/TLH/C-Section
<input type="checkbox"/>	LeFort Procedure / Colpoclesis

MATERNAL FETAL MEDICINE	
Royal College of Physicians and Surgeons of Canada specialty training in Obstetrics and Gynecology and recognized sub-specialty training in Maternal Fetal Medicine or a combination of education, training and experience satisfactory to the ZCDH, ZMD and CMO is required.	
<input type="checkbox"/>	Admitting Includes; assessment, evaluating, consulting, diagnosing, treating (medical/surgical options) and surgical assistant privileges.
<input type="checkbox"/>	Consultation Includes; conduct history and assessment for the purpose of making recommendations related to care and treatment.
<input type="checkbox"/>	Surgical Assistant At the direction of the surgeon, provides aid in technical functions in the OR.
Clinical Privilege	
<input type="checkbox"/>	Wound care management
Diagnostic	
<input type="checkbox"/>	Amniocentesis with ultra sound guidance
<input type="checkbox"/>	Chorionic villus sampling (trans cervical) ultra sound guidance
<input type="checkbox"/>	Chorionic villus sampling (trans abdominal) ultra sound guidance
<input type="checkbox"/>	Full diagnostic ultrasound
<input type="checkbox"/>	Nuchal translucency
<input type="checkbox"/>	Fetal invasive needle diagnostic evaluation (thorax and bladder) ultra sound guidance
<input type="checkbox"/>	Cordocentesis with ultra sound guidance
Therapeutic	
<input type="checkbox"/>	Intrauterine transfusion with ultra sound guidance
<input type="checkbox"/>	Fetal reduction with ultra sound guidance
<input type="checkbox"/>	Fetal shunts ultra sound guidance (bladder/thorax)
<input type="checkbox"/>	Radio frequency ablation with ultrasound guidance
<input type="checkbox"/>	Ultra sound guidance mono chorionic twin pathology (twin to twin laser therapy)

GYNECOLOGIC ONCOLOGY	
Royal College of Physicians and Surgeons of Canada specialty training in Obstetrics and Gynecology and recognized sub-specialty training in Gynecologic Oncology or a combination of education, training and experience satisfactory to the ZCDH, ZMD and CMO is required.	
<input type="checkbox"/>	Admitting Includes; assessment, evaluating, consulting, diagnosing, treating (medical/surgical options) and surgical assistant privileges.
<input type="checkbox"/>	Consultation Includes; conduct history and assessment for the purpose of making recommendations related to care and treatment.
<input type="checkbox"/>	Surgical Assistant At the direction of the surgeon, provides aid in technical functions in the OR.
Clinical Privilege	
<input type="checkbox"/>	Wound care management
<input type="checkbox"/>	Administration of gynaecologic-related cytotoxic chemotherapy
<input type="checkbox"/>	Hyperthermic intraperitoneal chemotherapy (HIPEC)
<input type="checkbox"/>	Insertion of a therapeutic device into the vagina and / or uterus for delivery of radiation
Oncology Surgery (Gynecology; Colo-rectal; Urology; Vascular) as per speciality training	
<input type="checkbox"/>	Radical Excision Vulva ; Radical Excision Uterus, Cervix and Adnexa
<input type="checkbox"/>	Bowel Resection and Enterotomy Repair, colostomy, ileostomy
<input type="checkbox"/>	Appendectomy
<input type="checkbox"/>	Cystotomy, Excision and Repair, ureteral reimplantation, formation of continent pouch and ileal conduit
<input type="checkbox"/>	Retroperitoneal lymph node dissection / excision (including sentinel lymph node)
<input type="checkbox"/>	Pelvic Vascular exposure and ligation
<input type="checkbox"/>	Abdominal tumour debulking surgery from diaphragm to pelvis
<input type="checkbox"/>	Pelvic exenteration and related reconstruction including grafts
Vulva Cancer	
<input type="checkbox"/>	Colposcopic vulvar examination
<input type="checkbox"/>	Biopsy / wide Excision
<input type="checkbox"/>	Simple Vulvectomy
<input type="checkbox"/>	Radical Vulvectomy (and inguinofemoral lymph node dissection)
<input type="checkbox"/>	Recto-vaginal fistula repair
Vagina Cancer	
<input type="checkbox"/>	Cancer related vaginal examination and surgery
Cervix Cancer	
<input type="checkbox"/>	Colposcopy and cancer related evaluations and treatments
<input type="checkbox"/>	Surgery (local; vaginal; pelvic) related to the evaluation and treatment of Cervical Cancer (approach by laparotomy and/or endoscopy)
<input type="checkbox"/>	Radical Hysterectomy

Uterine Cancer	
<input type="checkbox"/>	Endometrial evaluation (biopsy; hysteroscopy diagnostic or therapeutic)
<input type="checkbox"/>	Surgery (local; pelvic) related to the evaluation and treatment of Uterine Cancer (approach by laparotomy and / or endoscopy)
Fallopian / Ovarian Cancer	
<input type="checkbox"/>	Surgery (local; pelvic; abdominal) related to the evaluation and treatment of Fallopian / Ovarian Cancer (approach by laparotomy and / or endoscopy)
SURGICAL ROBOTICS (limited to Gynecology Oncology and selected sites)	
<input type="checkbox"/>	Surgical procedures which utilize Robotics.

REPRODUCTIVE ENDOCRINOLOGY	
Royal College of Physicians and Surgeons of Canada specialty training in Obstetrics and Gynecology and recognized sub-specialty training in Reproductive Endocrinology or a combination of education, training and experience satisfactory to the ZCDH, ZMD and CMO is required.	
<input type="checkbox"/>	Admitting Includes; assessment, evaluating, consulting, diagnosing, treating (medical/surgical options) and surgical assistant privileges.
<input type="checkbox"/>	Consultation Includes; conduct history and assessment for the purpose of making recommendations related to care and treatment.
<input type="checkbox"/>	Surgical Assistant At the direction of the surgeon, provides aid in technical functions in the OR.
Clinical Privilege	
<input type="checkbox"/>	Wound care management
<input type="checkbox"/>	Administration and Monitoring of Gonadotrophin therapy
<input type="checkbox"/>	Electroejaculation
<input type="checkbox"/>	Percutaneous Sperm Retrieval
<input type="checkbox"/>	Vibrostimulation
<input type="checkbox"/>	Oocyte Retrieval
<input type="checkbox"/>	IVF (Embryo Transfer)
<input type="checkbox"/>	Vaginal Ultrasound
<input type="checkbox"/>	Saline infusion sonohysterogram (SIS)
<input type="checkbox"/>	Intrauterine insemination (IUI)
<input type="checkbox"/>	Hysterosalpingogram (HSG)
REI Surgery	
<input type="checkbox"/>	Hysteroscopic diagnostic
<input type="checkbox"/>	Hysteroscopic therapeutic
<input type="checkbox"/>	Fallopocopy
<input type="checkbox"/>	Microsurgical Tubal Surgery
<input type="checkbox"/>	Gynecological Endoscopy/Laparoscopy (as per generalist privileges)
<input type="checkbox"/>	Laser Laparoscopy
<input type="checkbox"/>	Laparotomy-abdominal/open approach (as per generalist privileges)

UROGYNECOLOGY	
Royal College of Physicians and Surgeons of Canada specialty training in Obstetrics and Gynecology and recognized sub-specialty training in Urogynecology or a combination of education, training and experience satisfactory to the ZCDH, ZMD and CMO is required	
<input type="checkbox"/>	Admitting Includes; assessment, evaluating, consulting, diagnosing, treating (medical/surgical options) and surgical assistant privileges.
<input type="checkbox"/>	Consultation Includes; conduct history and assessment for the purpose of making recommendations related to care and treatment.
<input type="checkbox"/>	Surgical Assistant At the direction of the surgeon, provides aid in technical functions in the OR.
Clinical Privilege	
<input type="checkbox"/>	Wound care management
Incontinence procedures	
<input type="checkbox"/>	Retropubic midurethral sling*
<input type="checkbox"/>	Transobturator midurethral sling*
<input type="checkbox"/>	Single incision – “mini” – sling
<input type="checkbox"/>	Burch urethropexy – laparotomy / laparoscopy
<input type="checkbox"/>	Pubovaginal – “two team” – sling –by laparotomy or laparoscopy
<input type="checkbox"/>	Urethral bulking
Open/Laparotomy Procedures	
<input type="checkbox"/>	Abdominal paravaginal repair
<input type="checkbox"/>	Abdominal Sacrocolpopexy with mesh
<input type="checkbox"/>	Abdominal uterosacral vaginal vault suspension
<input type="checkbox"/>	Abdominal enterocele repair +/- mesh
<input type="checkbox"/>	Ureterolysis
<input type="checkbox"/>	Vesico-vaginal fistula repair
<input type="checkbox"/>	Open pre-sacral neurectomy
<input type="checkbox"/>	Abdominal removal of pelvic mesh, or prolapse/incontinence device
<input type="checkbox"/>	Transvaginal mesh repair for apical, anterior, posterior or enterocele related prolapse
<input type="checkbox"/>	Uterosacral vaginal vault suspension
<input type="checkbox"/>	Sacrospinous vaginal vault suspension
Vaginal Procedures	
<input type="checkbox"/>	Anterior colporrhaphy without mesh, primary/first repair*
<input type="checkbox"/>	Repeat anterior colporrhaphy without mesh
<input type="checkbox"/>	Posterior colporrhaphy without mesh, primary/first repair*
<input type="checkbox"/>	Repeat posterior colporrhaphy without mesh
<input type="checkbox"/>	Vaginal para-vaginal repair
<input type="checkbox"/>	Vaginal vesicovaginal fistula repair including closure of upper vagina (Latzsko)

<input type="checkbox"/>	Rectovaginal fistula repair
<input type="checkbox"/>	Vaginal removal of pelvic mesh, or prolapse/incontinence device
<input type="checkbox"/>	Vaginal MSK/trigger point injection for pelvic pain
Laparoscopic Surgeries	
<input type="checkbox"/>	Laparoscopic pre-sacral neurectomy
<input type="checkbox"/>	Laparoscopic sacrocolpopexy
<input type="checkbox"/>	Laparoscopic uterosacral vaginal vault suspension
<input type="checkbox"/>	Laparoscopic Ureterolysis
<input type="checkbox"/>	Laparoscopic vesico-vaginal fistula repair
<input type="checkbox"/>	Laparoscopic paravaginal repair
<input type="checkbox"/>	Laparoscopic pubovaginal sling
<input type="checkbox"/>	Laparoscopic removal of pelvic mesh, or prolapse/incontinence device
Cystoscopic Surgeries	
<input type="checkbox"/>	Cystoscopy
<input type="checkbox"/>	Ureteral stenting
<input type="checkbox"/>	Intravesical bladder injections – such as Botox
<input type="checkbox"/>	Bladder biopsy
<input type="checkbox"/>	Urethral stenting/catheterization for patency post procedure
<input type="checkbox"/>	Cystoscopic removal of pelvic mesh, or prolapse/incontinence device
<input type="checkbox"/>	Implantation (Single or Staged) of Interstim device
<input type="checkbox"/>	Pelvic floor ultrasound
Other Procedures	
<input type="checkbox"/>	Periurethral injections +/- bulking
<input type="checkbox"/>	Percutaneous Nerve Evaluation (PNE)

PAEDIATRIC GYNECOLOGY	
Royal College of Physicians and Surgeons of Canada specialty training in Obstetrics and Gynecology and recognized sub-specialty training in Paediatric Gynecology or a combination of education, training and experience satisfactory to the ZCDH, ZMD and CMO is required.	
<input type="checkbox"/>	Admitting Includes; assessment, evaluating, consulting, diagnosing, treating (medical/surgical options) and surgical assistant privileges.
<input type="checkbox"/>	Consultation Includes; conduct history and assessment for the purpose of making recommendations related to care and treatment.
<input type="checkbox"/>	Surgical Assistant At the direction of the surgeon, provides aid in technical functions in the OR.
Clinical Privilege	
<input type="checkbox"/>	Wound care management
<input type="checkbox"/>	Hymenorrhaphy
<input type="checkbox"/>	Repair of vertical vaginal septum
<input type="checkbox"/>	Repair of congenital abnormalities of the vulva
<input type="checkbox"/>	Repair of transverse vaginal septum +/- skin graft
<input type="checkbox"/>	McIndoe procedure for repair of mullerian agenesis
<input type="checkbox"/>	Correction of disorders of sexual development
<input type="checkbox"/>	Bilateral gonadectomy
<input type="checkbox"/>	Malignancies oopheropexy/ovarian biopsy for ovarian/fertility preservation
<input type="checkbox"/>	Surgical correction of virilizing disorders / pathology / genitalia
