

Quality Referral Evolution (QuRE)

Shared Decision Making is defined as the “collaboration between patients and providers, which considers patients’ values and preferences alongside evidence to make the best decisions.”

Webpage: [Quality Referral Evolution](#)

What is this resource?

Quality Referral Evolution (QuRE) webpage provides resources to improve the quality of communications between patients and providers to enhance the standards of practice in the consultation/referral process with patients and caregivers.

How does this relate to Shared Decision Making (SDM)?

QuRE promotes improved communication between healthcare providers and patients and families so that timely access to care is achieved, and to enhance understanding of treatment care.

How can I use this resource?

There are patient and caregiver resources such as the QuRE Patient & Caregiver Journal as well as additional downloadable resources for physicians, Nurse Practitioners, and patient & caregiver checklists.
