

Our Proclamation

What matters to you, matters to us.

What matters to patients and families drives everything we do. Our goal is to provide patients and families with the best possible healthcare experiences.

We believe

Healthcare is built on relationships and humanity. These truly unite the system, the individuals working within the system, and those seeking care.

Everyone should receive the experience of care they want for themselves and those they love.

Together we can always do better. Our staff, physicians, and other partners must work together with patients and families.

We are committed to

Making sure patients and families have stronger voices and are fully informed and involved in decisions about their healthcare.

Partnering with patients, families and communities when developing, delivering and improving healthcare services.

Enabling our people, whatever their titles, roles or locations, to act on what matters to patients and families.
