

# Acute Care Outbreaks in Alberta

## novel coronavirus (COVID-19)

---

**Last Updated: April 16, 2025**

---

There are COVID-19 outbreaks at the following AHS and Covenant Health acute care facilities:

---

## Calgary Zone

### Rockyview General Hospital

There is one unit currently on outbreak at Rockyview General Hospital

An outbreak was declared on one unit on April 8, 2025.

- Eight patients tested positive for COVID-19, an increase of four since the last update.
- Two healthcare workers tested positive for COVID-19.

## Edmonton Zone

### Alberta Hospital

There is one unit currently on outbreak at Alberta Hospital

An outbreak was declared on one unit on April 11, 2025.

- Two patients tested positive for COVID-19.

## Outbreak Protocols

Outbreak control measures have been implemented on each of the affected units. Any patient with symptoms, or who has tested positive for COVID-19, is isolated and treated in designated rooms.

All at-risk patients on each unit have been tested. Contact tracing for patients and healthcare workers potentially exposed to these individuals is ongoing.

All AHS facilities follow rigorous Infection Prevention and Control standards and practices. All healthcare workers are asked to self-assess for COVID-19 symptoms and exposure risk before reporting to a site for their shift, and our frontline teams practice diligent hand hygiene while at work.

Designated family/support persons and visitors entering AHS facilities are instructed to follow all appropriate measures. Visitation restrictions are in place to minimize risk of transmission to and from outside of the hospital.

# Acute Care Outbreaks in Alberta

## novel coronavirus (COVID-19)

If you are feeling unwell, please do not visit friends and loved ones in hospital at this time.

For visitation information and restrictions at our AHS healthcare facilities please see the [Family Support & Visitation page](#).

**Note:** As of Apr. 22, all healthcare worker COVID-19 cases still under investigation, or where the source of infection is inconclusive or indeterminate, will be counted as part of an acute care outbreak case count. Thus, as cases are under investigation, numbers may fluctuate as cases are resolved.
