

Personal Protective Equipment (PPE) Protocol for Healthcare Workers

Whenever you're at work

Continuous masking is required

If you are involved in patient care continuous masking and eye protection is required for all patient and staff interactions that occur within 2 meters/6 feet

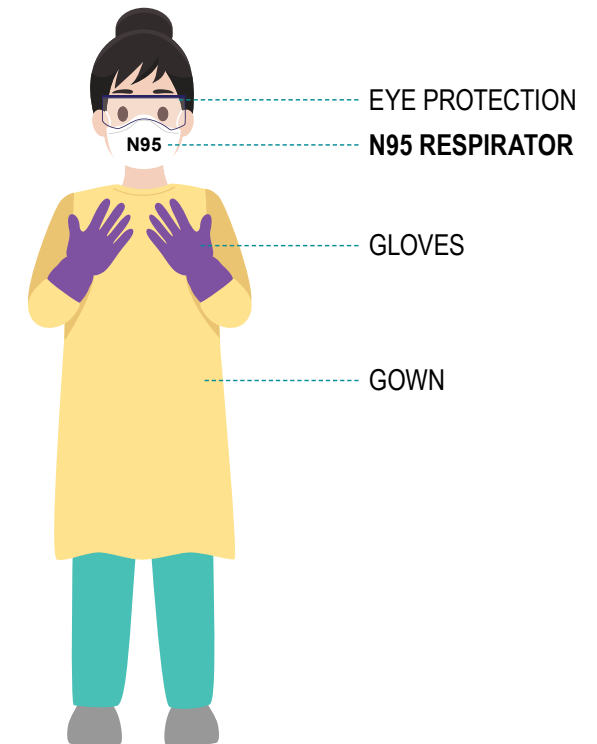

When caring for a patient with suspected or confirmed COVID-19

Contact and droplet precautions are required

An N95 respirator is required when an aerosol-generating medical procedure (AGMP) is performed

To learn more, connect with your PPE Safety Coach or search "[COVID-19 PPE](#)" on [ahs.ca](#).
See posters for [donning](#) and [doffing](#) on the COVID-19 PPE page.
