About COVID-19 tele-advice:

The COVID-19 tele-advice services are currently supported by specialists from respirology, general internal medicine and infectious disease. Here are examples of questions you could ask:

- My patient has Chronic Obstructive Pulmonary Disease (COPD), and I’m not sure if this is COVID-19 or acute exacerbation of COPD. Start on Prednisone or not?
- My patient sounds dehydrated, where should I send them?
- My patient is older and getting sicker but doesn’t want to go to hospital. Is there anything I can do?
- My patient has had symptoms for two weeks, not getting any worse. Should I do a chest x-ray?

Please note, patients should be directed to use the self-assessment tool available at [www.ahs.ca/covid](http://www.ahs.ca/covid) or call 811 to help determine whether they need to be tested for COVID-19.
Urgent tele-advice
If your patient may require hospitalization or transfer, use RAAPID.

**COVID-19 electronic advice also available**

Electronic advice is also available for non-urgent COVID-19 related questions through Alberta Netcare. Use the eReferral Advice Request option for non-urgent questions requiring advice within 2-5 days. Go to [www.albertanetcare.ca/eReferral.htm](http://www.albertanetcare.ca/eReferral.htm) for instructions on how to submit an advice request.
