Provincial Primary Care COVID-19 Adult Pathway

*Pathway is being continually reviewed and updated as required*

**Confirmed or suspected COVID-19 patient. Establish date of symptom onset (Day 0)**

- **Assess for red flags**
  - **Red flags**
  - **High risk based on outpatient antiviral eligibility?**
    - **No**
      - **Focus on self-management with specific advice based on symptoms and patient considerations**
      - **Advice to patient on when to seek follow up care**
    - **Yes**
      - **Eligibility**
      - **Confirm patient is COVID-19 positive via appropriate testing**
      - **Test options**

- **Interested in treatment?**
  - **Yes**
  - **Within 5 days of symptom onset?**
    - **No**
      - **Consider monitoring more closely as per risk stratification and monitoring guidance**
    - **Yes**
      - **Risk stratification**
      - **Call Outpatient COVID-19 Treatment Program via RAAPID (8am-8pm) or community pharmacist**

- **Any exclusion criteria?**
  - **Yes**
    - **Clinical resource guide**
  - **No**
    - **Clinical resource guide**

- **Any absolute contraindicated drug interactions with Paxlovid™?**
  - **No**
    - **Multiday monitoring by prescriber/pharmacist (for drug interaction management)**
  - **Yes**
    - **Pharmacy locator**
      - **Prescribe Paxlovid™ For questions, contact the Outpatient COVID-19 Treatment Program via RAAPID (8am-8pm) or community pharmacist**
      - **More Info**
        - **Continue to monitor; tele-advice available; do not order PFTs**
  - **Unsure**
    - **Consult drug interaction checker/management resource or Consult Community Pharmacist**

- **Any relative contraindicated drug interactions with Paxlovid™?**
  - **Yes**
    - **Yes/ Unsure**
      - **Drug interactions (p3)**
      - **Is Paxlovid™ the chosen treatment after consultation?**
  - **No**
    - **Post-infusion follow up as per Outpatient COVID-19 Treatment Program guidelines**

- **Post-COVID resources including Inter-professional Outpatient Programs (IPOP); order Pulmonary Function Tests (PFTs)**
  - **<12 weeks**
  - **>12 weeks**
  - **More Info**
    - **ConnectMD**
    - **Specialist Link**
  - **Functional assess. tool**
    - **ahs.ca/covidphc**
    - **Background**

- **Safety net flags**
  - **Self-manage RAG Tools**

- **Rapid deterioration is most common during the second week after symptom onset**

- **Refer to the Guidance for Community Providers resource for viral respiratory illness screening and guidance**
EXPANDED DETAILS

This pathway is intended to be followed for patients who are confirmed or suspected COVID-19 positive.

*NEW* The June 2022 changes to this pathway were made due to the following:
1. Increased vaccine uptake
2. Reduced severity of illness with currently circulating strains
3. Availability of RATs
4. Availability of COVID-19 treatments

*NEW* Additional Paxlovid™ exclusion criteria
• At this time, it is NOT recommended that Paxlovid™ treatment be extended or repeated should patients have rebound symptoms after completing a course of treatment.
• At this time, Paxlovid™ should NOT be considered a treatment for individuals experiencing symptoms of post-COVID. For more information, see www.ahs.ca/assets/info/ppih/if-ppih-covid-19-paxlovid-faq-hcw.pdf

*NEW* False negative rapid antigen test (RAT)
• New evidence indicates that swabbing of both mouth and nose is more effective for detecting COVID-19 when using a RAT. For more information, see www.alberta.ca/rapid-testing-at-home.aspx
• RAT can be falsely negative if tested early from symptom onset. People are most likely to be positive 2-4 days from symptom onset but can be positive on the day of symptom onset up to ~10 days. A repeat test can be done 24h from a negative to improve sensitivity.

*NEW* New medication to prevent COVID-19
AHS is offering a new medication, tixagevimab and cilgavimab (Evusheld), for prevention of COVID-19 for eligible patients. For more information, see COVID-19 Outpatient Treatment | www.ahs.ca/topics/Page17753.aspx
Clinical risk stratification

<table>
<thead>
<tr>
<th>High risk</th>
<th>Average risk</th>
<th>Lower risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Patients with any of the safety net flags</td>
<td>• 40-60 years old with no medical comorbidities</td>
<td>• Otherwise healthy adults</td>
</tr>
<tr>
<td>• Patients with symptom deterioration</td>
<td></td>
<td>• No comorbidities</td>
</tr>
<tr>
<td>• Any age with medical comorbidities</td>
<td></td>
<td>• No safety net flags</td>
</tr>
<tr>
<td>• Age &gt; 60 years old</td>
<td></td>
<td>• Age 1-39 years old with no medical comorbidities</td>
</tr>
<tr>
<td>• Pregnancy</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Any age who is immunocompromised</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Not fully vaccinated**</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*NEW* Monitoring

• Tailor monitoring according to clinical risk stratification and assessment
• The frequency and duration of follow-up will depend on the risk for severe disease, the severity of symptoms, and the patient’s ability to self-report worsening symptoms.

*Updated* Safety net flags

• Limited/no access to phone/tablet/computer devices for virtual health
• Limited/no access to transportation
• Socially isolated (Lives alone, unable to meaningfully connect with others through technology, little to no social network)
• Lack of caregiver support if needed
• Inability to maintain hydration (Diarrhea, vomiting, cognitive impairment, poor fluid intake)
• Food/financial insecurity
• Receive homecare support
• Challenges with health literacy or ability to understand treatment recommendations or isolation expectations
• Unable to self-manage

Isolation and quarantine information

• Visit [Isolation and quarantine requirements | Alberta.ca](https://www.alberta.ca/isolation-and-quarantine-health-checks-37796) for the most up-to-date information on isolation and quarantine.

• Respiratory hygiene practices (e.g. hand washing, covering your cough, social distancing, wearing a mask, etc.) continue to be strongly encouraged. Visit [COVID-19 Prevention & Protection | AHS](https://www.ahs.ca/covid-19-prevention-protection) for more information.
Red flags

- Severe shortness of breath at rest
- Difficulty breathing
- Pain or pressure in chest
- Cold, clammy or pale mottled skin
- New onset of confusion
- Blue lips or face
- Becoming difficult to rouse
- Coughing up blood
- Reduced urine output
- Return of cough after period of improvement *may signal development of COVID-19 pneumonia
- Return of fever after afebrile period *may signal development of COVID-19 pneumonia
- Oxygen Saturation
  - Helpful tool to indicate disease severity when available
  - A new reading of < 92% - If previously healthy lungs or previously documented normal O2 sat
  - A new reading of < 90% - If underlying lung disease with documented low normal O2 sat at baseline
  - If patient on home oxygen normally and their O2 requirements increase with COVID-19 illness

Additional red flags for maternity patients

- Orthopnea or paroxysmal nocturnal dyspnea (PND)
- Fever ≥38°C despite use of acetaminophen
- Weakness limiting activities of daily living (ADLs)
- Persistent nausea and vomiting > 12 hours
- Obstetrical complaints such as:
  - Regular uterine contractions
  - Ruptured membranes
  - Vaginal bleeding
  - Decreased fetal movement
- Oxygen Saturation
  - Helpful tool to indicate disease severity when available
  - A reading of <95% is a red flag for all pregnant women
  - If patient on home oxygen normally, and the O2 requirements increase with COVID-19 illness

Red flags: more information

</table>
| **Clinical presentation** | • Patient has impaired level of consciousness  
• Patient has severe respiratory distress (documented hypoxia, breathless at rest, unable to speak in short sentences)  
• New weakness with inability to ambulate independently |
| **Available support and resources** | Call 9-1-1 |
## URGENT management <1-hours assessment

<table>
<thead>
<tr>
<th>Clinical presentation</th>
<th>Available support and resources</th>
</tr>
</thead>
</table>
| • Patient clinically stable (see Emergent Management criteria)  
• Patient may require hospitalization or transfer | **Call RAAPID**  
• RAAPID North (for patients north of Red Deer): 1-800-282-9911 or 780-735-0811  
• RAAPID South (for patients in and south of Red Deer): 1-800-661-1700 or 403-944-4486  
• Website: [RAAPID | Alberta Health Services](#) |

## SEMI-URGENT management <24-hour assessment in residence

<table>
<thead>
<tr>
<th>Clinical presentation</th>
<th>Available support and resources</th>
</tr>
</thead>
</table>
| Patient needs in home assessment | **Call Community Paramedics Response Team Program**  
Patients in and North of Red Deer:  
Call 1-833-367-2788 for same day referrals  
Patients South of Red Deer:  
Call 1-855-491-5868 for same day referrals  
**Hours**: 6:00 am to 10:00 pm 7 days a week*  
*The referring physician must be able to consult with the community paramedic when they are with the patient for treatment orders as well as to ensure proper follow up |

**About:**  
• Program provides responsive urgent mobile healthcare by facilitating in community assessment, treatment and diagnostics in collaboration with the patient’s care providers.  
• Response time is confirmed upon receipt of referral based upon patient acuity or when service is requested.  
• Upon receipt of referral a community paramedic will be dispatched to the patients dwelling where they will conduct a comprehensive assessment and develop a customized care plan after consultation with the patient’s most responsible healthcare prescriber.  
• A detailed record of the patient encounter will be sent to the patients’ healthcare team.  

**Where:**  
• Paramedic teams have locations in each zone, but the program is not available in all areas of the province.  
• Paramedic teams provide coverage within a 50km distance from their home location.  
• Locations are listed on the [website](#) as well as in [Alberta Referral Directory](#)  

**Referral Form:**  
• Access the referral form through [Alberta Referral Directory](#) (search ‘Mobile Integrated Healthcare’) **OR**  
through the website (under “Forms & Information”) [EMS Mobile Integrated Healthcare – Community Paramedicine | AHS](#)
## NON-URGENT daytime advice

The COVID-19 tele-advice services are currently supported by specialists from respirology, general internal medicine and infectious disease.

<table>

</tr>
</thead>
</table>
| Available support and resources | **Contact local resources in your regional centres:**  
  - **Contact ConnectMD Tele-advice**  
    (North, Edmonton & Central Zones)  
    - Visit [www.pcnconnectmd.com](http://www.pcnconnectmd.com) or call/text: 1-844-633-2263  
    - Hours: Monday to Thursday, 9 a.m. to 6 p.m. and Fridays, 9 a.m. to 4 p.m. (except statutory holidays)  
    - *Summer hours: Monday 10a.m - 4p.m; Friday 9a.m - 2p.m; other days same as above  
    - Providers can expect to receive a call-back within two to three hours  
  - **Contact Specialist Link Tele-advice**  
    (Calgary & South Zones)  
    - Visit [www.specialistlink.ca](http://www.specialistlink.ca) or call: 1-844-962-5465  
    - Hours: 8 a.m. to 5 p.m. from Monday to Friday (except statutory holidays)  
    - Providers can expect to receive a call-back within one hour |

## NON-URGENT advice

<table>
<thead>
<tr>
<th>Clinical presentation</th>
<th>You have non-urgent COVID-19-related questions and require electronic advice</th>
</tr>
</thead>
</table>
| Available support and resources | **Alberta Netcare eReferral Advice**  
  - Use the eReferral Advice Request option for non-urgent questions requiring advice within 2-5 days.  
  - Go to [www.albertanetcare.ca/eReferral.htm](http://www.albertanetcare.ca/eReferral.htm) for instructions on how to submit an advice request. |

### For symptoms persisting longer than 14 days from onset

Many patients experience ongoing symptoms past 14 days, such as residual cough or fatigue. If these patients have clearly improved, these residual symptoms can likely be managed with conservative care and reassurance.

The [Getting Healthy After COVID-19](https://www.ahs.ca/topics/Page17397.aspx) page offers many resources to support patients with self-management as well as options for getting medical support and answers to patient questions.
BACKGROUND

About this pathway

• The Primary Care COVID-19 Adult Pathway was originally developed in 2020 as part of the Calgary Zone’s Specialist Link initiative. Following the emergence of the COVID-19 pandemic, a team that included specialists from Respirology and Infectious Disease, AHS Primary Health Care, Primary Care Networks and members of the Calgary Zone Specialty Integration Task Group developed this pathway to help support family physicians to care for patients with COVID-19 in the community.

• Based on the successful adoption of the Primary Care COVID-19 Adult Pathway within the Calgary Zone, and adapted versions of this pathway in other zones, in 2021 AHS Primary Health Care led an initiative to validate the applicability of the pathway for Alberta and to foster adoption of the pathway across the province, including adapting the pathway for use in primary care within the context of a post-pandemic environment.

• This pathway includes hyperlinks and is intended to be used as an electronic tool.

Authors and conflict of interest declaration

• Names of participating reviewers and their conflict of interest declarations are available on request.

Pathway review process, timelines

• This primary care pathway was created/updated with up to date knowledge at the time it was created/updated. It will be reviewed on a consistent basis as the knowledge and process base evolves. If you have concerns or feedback please email phc@ahs.ca and enter ‘COVID-19 adult pathway feedback’ in the subject line.
