Helping You Stay Connected
Online tools for patients and families

We understand it’s hard not being able to support a patient in person, but visitor restrictions are necessary at this time to ensure the safety of all patients, families and staff. Here are some ways to help you stay connected.

- Keep in touch using phone calls, texts or emails. Connect with your healthcare team to discuss options for receiving updates.

- Connect “face to face” virtually using a video messaging service.

- Send a message to a patient using Patient Well Wishes on ahs.ca.
