COVID-19

What to expect with your COVID-19 test

Welcome to your COVID-19 test.
It's quick and easy. Here's what will happen:

1. A healthcare worker wearing protective gear meets you

2. You show your photo ID and personal health care card

3. We ask you a few questions and say if we will swab your nose or throat

4. You let us know if you have questions or concerns

5. Tilt your head back

6. We will swab your nose or throat

7. We tell you how you will get your test results.

You're all done!

For more about your test results, visit **ahs.ca/results**.

We're in this together.
We'll get through it together.
