COVID-19 vaccine safe in pregnancy? (Is COVID-19 vaccine safe in pregnancy?)

• The risk of getting COVID-19 and having serious complications is higher than the risk of being immunized during pregnancy.

(serious complications related to COVID-19 infection are more common if you’re pregnant than if you’re not pregnant.)

• Maternal care, health, and having serious complications is higher than the risk of being immunized during pregnancy.

The risks of being infected with COVID-19 if I’m pregnant)

• Is COVID-19 vaccine safe in pregnancy?

• What are the benefits of getting the COVID-19 vaccine?

• What you need to know...
Who can get a COVID-19 vaccine?

(Anyone who is pregnant can now get a COVID-19 vaccine.)

• Visit [ahs.ca/covidvaccine](https://ahs.ca/covidvaccine) for more information. If you are unsure about your COVID-19 vaccination status, call 811. You will be asked a few questions about your recent COVID-19 vaccination. You can also use the [COVID-19 Vaccine Tracker](https://ahs.ca/covidvaccine) to track your COVID-19 vaccination.

• Ask your health-care provider about your COVID-19 vaccination status. You can also use the [COVID-19 Vaccine Tracker](https://ahs.ca/covidvaccine) to track your COVID-19 vaccination.
