

COVID-19

Public PCR testing is not available at Emergency Departments or Urgent Care Centres

Free public PCR testing at **AHS Assessment Centres** is **only** available if you have COVID-19 symptoms and are:

- Pregnant
- Eligible for sotrovimab
- A household contact of someone working in continuing care or a hospital
- A returning international traveller who arrived in Canada in the past 14 days

If these do not apply to you, you can use an at-home rapid test to screen for COVID-19.

If you cannot get an at-home test, stay home and away from other people until your symptoms get better.

Visit ahs.ca/covidscreen for more information.

We're in this together.
We'll get through it together.
