Mobile mammography service to visit Bow Island

BOW ISLAND — Women ages 45 to 74 — the group most at risk of developing breast cancer — will have local access to mammography services this month when Alberta Health Services' Screen Test program visits Bow Island.

A mobile mammography trailer will be at the Bow Island Provincial Building Health Unit (802 6 St. E.) on April 22- 24.

Appointments are required. Residents can book an appointment or learn more about the program by calling 1-800-667-0604.

Screen Test is improving access to cancer screening for thousands of women in Alberta communities where mammography is not readily available.

A mammogram is an X-ray of the breast and has proven to be the most effective way to detect breast cancer. Early detection allows for a greater number of options for treatment and a better chance of survival.

Visit <https://screeningforlife.ca/breast/screen-test-mobile-clinics/> for more information and a complete listing of Screen Test mobile sites.

Alberta Health Services is the provincial health authority responsible for planning and delivering health supports and services for more than four million adults and children living in Alberta. Our mission is to provide a patient-focused, quality health system that is accessible and sustainable for all Albertans. Our current focus is on reducing emergency department wait times, improving EMS response times, increasing access to surgeries, and improving patient flow.
