

**ORDER OF AN EXECUTIVE OFFICER
CLOSED FOR TENANT ACCOMMODATION PURPOSES
ORDER TO VACATE**

To: 1309231 Alberta Ltd. Shanthi Saunder Raj Saunder
"the Owner" "the Owner" "the owner"

And To: All Occupant(s) of the following Housing premises:

RE: Those housing premises located in Edmonton, Alberta and municipally described as:
11735 122 Street NW

WHEREAS I, an **Executive Officer** of **Alberta Health Services**, have inspected the above noted premises pursuant to the provisions of the **Public Health Act**, RSA 2000, c. P-37, as amended;

AND WHEREAS such inspection disclosed that the following conditions exist in and about the above noted premises which are or may become injurious or dangerous to the public health or which might hinder in any manner the prevention or suppression of disease, namely:

- a. There were water infiltration/damage and mould growth in the basement laundry room and living room; Indications include mildew smells, cracks in foundation, lifting floor coverings.
- b. The roof was not waterproof and weatherproof; indications include multiple locations of visible light seen through the attic.
- c. The exterior cladding on the east side of the building was bulging; indications of water infiltration.
- d. The mainfloor northeast window was in disrepair, including broken glass and rotten wood frame.
- e. There were impeded egress in two basement room: The windows could not be fully opened.

AND WHEREAS such inspection disclosed that the following breaches of the Public Health Act and the Housing Regulation, Alberta Regulation 173/99, and the Minimum Housing and Health Standards exist in and about the above noted premises, namely:

- a. Item (a) is in contravention of section III (1) (b, c and d) of the Minimum Housing and Health Standards which states that: (b) Basements, cellars or crawl spaces shall be structurally sound, maintained in good repair and free from water infiltration and accumulation. (c) Building materials that have been damaged or show evidence of rot or other deterioration shall be repaired or replaced. (d) Repairs or modifications required by the Executive Officer of any structural element of the housing premises may require the design and/or supervision of a professional structural engineer or a Safety Codes Officer (Building Discipline).
- b. Item (a) is also in contravention of section III(5) of the Minimum Housing and Health Standards which states that: All walls, windows, ceilings, floors, and floor coverings shall be maintained in good repair, free of cracks, holes, loose or lifting coverings and in a condition that renders it easy to clean.

- c. Items (b and c) is in contravention of section III(2)(a) of the Minimum Housing and Health Standards which states that: The roof and exterior cladding of walls shall be maintained in a waterproof, windproof and weatherproof condition.
- d. Item (d) is in contravention of section III(2)(b)(i) of the Minimum Housing and Health Standards which states that: (i) All windows and exterior doors shall be: Maintained in good repair, free of cracks and waterproof.
- e. Items (a, b, and c) is also in contravention of section 5(2) of the Housing Regulation (AR 173/99) which states that: No person shall cause or permit any condition in housing premises that is or may become injurious or dangerous to the public health, including any condition that may hinder in any way the prevention or suppression of disease
- f. Item (e) is in contravention of section III(3)(b) of the Minimum and Health Standards which states that: For buildings of 3 storeys or less and except where a bedroom door provides access directly to the exterior or the suite is sprinklered, each bedroom shall have at least one outside window which may be opened from the inside without the use of tools or special knowledge. (ii) Windows referred to in section 3(b)(i) shall provide unobstructed openings with areas not less than 0.35 m² (3.8ft²), with no dimension less than 380 mm (15"). (iii) If the window referred in section 3(b)(i) is provided with security bars, the security bars shall be installed so they may be opened from the inside without the use of any tools or special knowledge. (iv) Notwithstanding section 3(b)(i), (ii) and (iii), alternate provisions for emergency egress may be approved by an executive officer where, after consultation with a safety codes officer, the executive officer is satisfied that the alternate provisions provide for means of emergency egress.

AND WHEREAS, by virtue of the foregoing, the above noted premises are hereby declared to be **Closed for Tenant Accommodation Purposes**.

NOW THEREFORE, I hereby **ORDER** and **DIRECT**:

1. That the occupants vacate the above noted premises **on or before July 1, 2022**.
2. That the Owner undertake and diligently pursue the completion of the following work in and about the above noted premises, namely:
 - a. Retain the services of an Environmental Consultant or Industrial/Occupational Health Hygienist, that must be approved by Alberta Health Services and prior to the commencement of renovation or repairs:

As this premise was built prior to 1990, the presence of asbestos within building materials is likely thus precautions must be taken. The consultant must assess the conditions within the above noted premises including performing applicable sampling for asbestos containing materials.

In the event asbestos is present provide Environmental Public Health with a written asbestos management/abatement plan in accordance with the Alberta Occupational Health and Safety Code for Asbestos abatement. Ensure proper removal/handling of impacted materials follow current codes and standards.

Have the environmental consultant assess the conditions within the above noted premises for all water damaged materials and mould. A full pre mould remediation inspection report is required. At a minimum the report must describe the building construction, finishes, materials and components and recommendations for restoration. All hazardous building materials are to be properly managed and disposed of in accordance with government standards and guidelines and industry codes of practice. Once the materials have been removed and a post mould remediation report is required this will include photographic evidence that all moldy material has been removed and environmental air quality sampling. Testing and reporting shall follow the requirements outlined in Alberta Health Services' Fungal Air Testing Protocol.

- b. Hire a qualified foundation contractor to assess the conditions of the foundation and conduct any necessary repairs to correct the sources of water infiltration to the basement.
 - c. Retain the services of a professional roofer to repair or replace the roof. The roofer must provide a written inspection report indicating the state of the roof. Report must be submitted to Alberta Health.
 - d. Remove and replace all damaged or mouldy material.
 - e. Repair or replace all damaged ceilings, drywalls and floor coverings, ensure all walls, ceilings, floors, and floor coverings are maintained in good repair, free of cracks, holes, loose or lifting coverings and in a condition that renders it easy to clean.
 - f. Ensure the room in the basement is not used for sleeping purposes, OR to modify the window to meet the emergency egress requirements which can stay open on its own and provide an opening of at least 0.35m² for egress.
3. That until such time as the work referred to above is completed to the satisfaction of an Executive Officer of Alberta Health Services; the above noted premises shall remain closed for tenant accommodation purposes.

The above conditions were noted at the time of inspection and may not necessarily reflect all deficiencies. You are advised that further work may be required to ensure full compliance with the Public Health Act and regulations, or to prevent a public health nuisance.

DATED at Edmonton, Alberta, June 23, 2022.

Executive Officer
Alberta Health Services
