

**ORDER OF AN EXECUTIVE OFFICER
CLOSED FOR TENANT ACCOMMODATION PURPOSES
ORDER TO VACATE**

To: Darlene Osepchuk
"the Owner"

And To: All Occupant(s) of the following Housing premises:

RE: Those housing premises located in Edmonton, Alberta and municipally described as:
13415 102 Street NW

WHEREAS I, an **Executive Officer** of **Alberta Health Services**, have inspected the above noted premises pursuant to the provisions of the **Public Health Act**, RSA 2000, c. P-37, as amended;

AND WHEREAS such inspection disclosed that the following conditions exist in and about the above noted premises which are or may become injurious or dangerous to the public health or which might hinder in any manner the prevention or suppression of disease, namely:

- a. There was a hole which was sealed with plastic film and duct tape on the basement bathroom ceiling, and there was possible more water damage and mould growth inside the ceiling.
- b. The laminate floor tiles in the basement were lifting, and there was possible mould growth underneath.
- c. There was water damage and possible mould growth on the basement baseboard.
- d. The egress window openings in the two bedrooms in the basement were measured 10 inches X 18 inches, which was too small for egress purposes.
- e. There was no smoke alarm installed in the basement where two rooms were being used as bedrooms.

AND WHEREAS such inspection disclosed that the following breaches of the Public Health Act and the Housing Regulation, Alberta Regulation 173/99, and the Minimum Housing and Health Standards exist in and about the above noted premises, namely:

- a. Items (a, b and c) are in contravention of section III (5) of the Minimum Housing and Health Standards which states that: All walls, windows, ceilings, floors, and floor coverings shall be maintained in good repair, free of cracks, holes, loose or lifting coverings and in a condition that renders it easy to clean. (a) Rooms containing a flush toilet and/or a bathtub or shower shall have walls and floors that are smooth, non-absorbent to moisture and easy to clean. All walls shall form a watertight joint with each other, the floor, the ceiling and where applicable with the bathtub or shower
- b. Items (a, b and c) are also in contravention of section III (1) (c and d) of the Minimum Housing and Health Standards which states that: (c) Building materials that have been damaged or show evidence of rot or other deterioration shall be repaired or replaced. (d) Repairs or modifications required by the Executive Officer of any structural element of the

housing premises may require the design and/or supervision of a professional structural engineer or a Safety Codes Officer (Building Discipline).

- c. Item (d) is in contravention of section III(3)(b) of the Minimum and Health Standards which states that: For buildings of 3 storeys or less and except where a bedroom door provides access directly to the exterior or the suite is sprinklered, each bedroom shall have at least one outside window which may be opened from the inside without the use of tools or special knowledge. (ii) Windows referred to in section 3(b)(i) shall provide unobstructed openings with areas not less than 0.35 m² (3.8ft²), with no dimension less than 380 mm (15”). (iii) If the window referred in section 3(b)(i) is provided with security bars, the security bars shall be installed so they may be opened from the inside without the use of any tools or special knowledge. (iv) Notwithstanding section 3(b)(i), (ii) and (iii), alternate provisions for emergency egress may be approved by an executive officer where, after consultation with a safety codes officer, the executive officer is satisfied that the alternate provisions provide for means of emergency egress.
- d. Item (e) is in contravention of section IV (12) of the Minimum Housing and Health Standards which states that: Smoke alarms within dwellings shall be installed between each sleeping area and the remainder of the suite and, where hallways serve the sleeping areas; the smoke alarms shall be installed within the hallway. (a) Smoke alarms shall be operational and in good repair at all times.

AND WHEREAS, by virtue of the foregoing, the above noted premises are hereby declared to be **Closed for Tenant Accommodation Purposes**.

NOW THEREFORE, I hereby **ORDER** and **DIRECT**:

1. That the occupants vacate the above noted premises **on or before November 9, 2022**.
2. That the Owner undertake and diligently pursue the completion of the following work in and about the above noted premises, namely:
 - a. Retain the services of an Environmental Consultant or Industrial/Occupational Health Hygienist, that must be approved by Alberta Health Services and prior to the commencement of renovation or repairs:

As this premise was built prior to 1990, the presence of asbestos within building materials is likely thus precautions must be taken. The consultant must assess the conditions within the above noted premises including performing applicable sampling for asbestos containing materials.

In the event asbestos is present provide Environmental Public Health with a written asbestos management/abatement plan in accordance with the Alberta Occupational Health and Safety Code for Asbestos abatement. Ensure proper removal/handling of impacted materials follow current codes and standards.

Have the environmental consultant assess the conditions within the above noted premises for all water damaged materials and mould. A full pre mould remediation inspection report is required. At a minimum the report must describe the building construction, finishes, materials and components and

recommendations for restoration. All hazardous building materials are to be properly managed and disposed of in accordance with government standards and guidelines and industry codes of practice. Once the materials have been removed and a post mould remediation report is required this will include photographic evidence that all moldy material has been removed and environmental air quality sampling. Testing and reporting shall follow the requirements outlined in Alberta Health Services' Fungal Air Testing Protocol.

- b. Remove and replace all damaged or mouldy material includes all damaged ceilings, drywalls and floor coverings. Ensure all walls, ceilings, floors, and floor coverings are maintained in good repair, free of cracks, holes, loose or lifting coverings and in a condition that renders it easy to clean.
 - c. Install a functioning smoke alarm on the ceiling in the basement outside the rooms which were used as bedrooms. Ensure that all smoke alarms are functioning and are less than 10 years old.
 - d. Ensure the room in the basement is not used for sleeping purposes, OR to modify the window to meet the emergency egress requirements which can stay open on its own and provide an opening of at least 0.35m² for egress.
3. That until such time as the work referred to above is completed to the satisfaction of an Executive Officer of Alberta Health Services; the above noted premises shall remain closed for tenant accommodation purposes.

The above conditions were noted at the time of inspection and may not necessarily reflect all deficiencies. You are advised that further work may be required to ensure full compliance with the Public Health Act and regulations, or to prevent a public health nuisance.

DATED at Edmonton, Alberta, November 8, 2022.

Executive Officer
Alberta Health Services

Confirmation of a verbal order issued to **Darlene**, November 4, 2022.

You have the right to appeal

A person who a) is directly affected by a decision of a Regional Health Authority, and
