RE:	Removal of Epic Enter/Edit Functionality for POCT Pregnancy Urine Manual Test Result Entry

PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

Key Message

- Effective November 25, 2025, Epic Enter/Edit (E/E) functionality for **POCT Pregnancy Urine Manual** test result entry will be removed, as part of the overall phased approach to remove all POCT E/E functionality.
 - All POCT patient results must be documented through the provincial POCT middleware, AegisPOC, either automatically with connected devices or through manual test result entry (MTRE) for unconnected devices. This workflow facilitates positive patient identification and completes patient test result documentation in Connect Care, including Epic and Netcare.

Background

- Epic E/E POCT result entry was introduced in Connect Care Launch 1 as an **interim** workflow to allow for basic documentation of POCT test results for unconnected devices.
- There are serious limitations to the E/E workflow compared to AegisPOC MTRE, such as: 1) results are not in Netcare, 2) up-to-date reference intervals and other testing information do not appear alongside results, 3) results cannot be trended, 4) results cannot be retrieved within lab data analysis requests, and 5) test frequency cannot be tracked to automatically recertify POCT operators.
- Several Epic E/E POCT result entry functionalities were decommissioned in June 2025 (Phase 1; see Appendix 1). Clinical impact was minimal.
- Additional Epic E/E POCT result entry functionalities will be decommissioned in future phases, following communication and educational resource sharing to clinical areas to support the changes (see Appendix 1).

How this will impact you

- Effective November 25, Epic E/E test result entry for **POCT Pregnancy Urine Manual** will be unavailable.
- You must use appropriate AegisPOC MTRE workflows to document urine pregnancy POCT results in Connect Care: *Insite.ahs.ca/Teams > Lab Services > Our Services > Point of Care Testing > Connect Care Resources*.
 - Workflows are **only** available to clinical areas that perform POCT under APL POCT support.

Action Required

- If your clinical area performs supported urine pregnancy POCT, use the AegisPOC workflow **ONLY**.
- Contact your Zone POCT department for further guidance and follow-up if:
 - Your clinical area is performing urine pregnancy POCT that is unsupported by APL POCT
 - You use an E/E workflow for a test(s) outlined for a future phase(s) in Appendix 1.

Appendix 1. Timeline for Epic Enter/Edit POCT Result Entry Removal

Phase	Enter/Edit Test Orderable	Removal Date
Phase 1	<i>POCT B-Type Natriuretic Peptide (NT-ProBNP) Manual*</i> <i>POCT Chemistry 8 Manual*</i> <i>POCT Creatinine*</i> <i>POCT HbA1c Manual*</i> <i>POCT Hemoglobin Manual*</i> <i>POCT Thromboelastometry (Rotem) Manual*</i> <i>POCT HIV Rapid Assay Manual**</i>	Complete (26 June 2025)
Phase 2a	POCT Pregnancy Urine Manual	25 November 2025
Phase 2b*	POCT AmnioTest Manual POCT AmniSure Manual	16 December 2025
Phases 3 and 4*	AHS Non-Connected Glucose Meter POCT Manual POCT Bilirubinometry Manual (Jaundice Meter) POCT Urinalysis Dipstick Manual	TBD, no later than 31 Mar 2026
Phase 5*	POCT INR Manual	TBD, no later than 31 Mar 2026

**Tests may be shifted to other phases as dictated by resource availability.*
