<b>RE:</b>	Update to Urine Myoglobin Reference Intervals

---

## PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

---

### Key Message

- Effective December 7, 2022, urine myoglobin reference interval will be updated to < 65 ug/L.

### How this will impact you

- Due to a switch of analyzers in Core Chemistry laboratory at University of Alberta Hospital (UAH), urine myoglobin values obtained in the new instruments will be on average approximately 200-300% higher.
- The new reference interval of <65 ug/L is validated in-house and updated to reflect the significant change in values.

### Action Required

- Be aware of the new reference interval for urine myoglobin. See APL Test Directory for most updated information.

### Questions/Concerns

- Albert Tsui, PhD, Clinical Biochemist, University of Alberta Hospital, 587-782-2674, [albert.tsui@aplabs.ca](mailto:albert.tsui@aplabs.ca)
