

MOLECULAR HEMATOLOGY REQUISITION

PROVINCE	PERSONAL HEALTH NUMBER (PHN) _____	MEDICAL RECORD NUMBER
----------	---------------------------------------	-----------------------

Shaded areas are Required Information

ORDERING PHYSICIAN (Apply CLS Dr. Office Stamp Here): Last Name / Full First Name: Phone Number: 5 Digit Client #: Alpha Suffix Provider #:	PATIENT LAST NAME FULL FIRST NAME MIDDLE NAME			
	PATIENT ADDRESS CITY, PROVINCE POSTAL CODE			
COPY TO: 1) _____ Last Name Full First Name Office Address/Location 2) _____ Last Name Full First Name Office Address/Location	CHART NUMBER	GENDER	DATE OF BIRTH Y Y Y Y / M M / D D	PATIENT PHONE NUMBER (____) _____
	ACCESSION NUMBER:			

TREATMENT SPECIFICS (DRUGS/DOSAGE/START DATE)	TRANSPLANTED: <input type="checkbox"/> YES <input type="checkbox"/> NO 1 ST Transplant Date: _____ 2 ND Transplant Date: _____
---	--

DO NOT use this requisition for bone marrow test requests; see CLS form REQ9061BM *Bone Marrow Pathology Requisition*.

DO NOT use this requisition for **Chimerism Studies** **Screening/monitoring hematopoietic cell chimerism**

For peripheral blood chimerism testing, see CLS form FC3200 *Flow Cytometry Requisition*.
 For bone marrow chimerism test requests, see CLS form REQ9061BM *Bone Marrow Pathology Requisition*.

Philadelphia Chromosome Transcript Analysis (Nested PCR) <input type="checkbox"/> PHLR PB (Peripheral Blood)	Screening for CML/ALL, BCR-ABL1 gene transcripts
--	---

Quantitative PCR Analysis of BCR-ABL1 Fusion Gene Transcripts (Q-PCR) <input type="checkbox"/> QPCRPH1 (Peripheral Blood)	Monitoring residual disease in CML
---	---

APL Transcript Analysis (Nested PCR) <input type="checkbox"/> APL PB (Peripheral Blood)	Screening/monitoring PML-RARA gene transcripts
---	---

JAK2-V617F Mutation Analysis <input type="checkbox"/> JAK2 PB (Peripheral Blood)	Screening for myeloproliferative neoplasms
--	---

FLT3 and NPM1 Mutation Analysis* <input type="checkbox"/> FLT3 NPM1 PB (Peripheral Blood)	Screening for FLT3 and NPM1 gene mutations *FLT3/NPM1 mutation analysis may include CEBPA testing if clinically indicated
---	---

Molecular Hemostasis Studies (Factor VIII inversion, 2N vonWillebrand Factor, Multimers, Carrier Study: Hemophilia A, B or vWD) <input type="checkbox"/> MH HEMST (Peripheral blood) State test requested: _____ Family history: _____
--

Miscellaneous Test: Miscellaneous hemostasis (other than above) and oncology tests <input type="checkbox"/> MH MISC (Peripheral blood) State test requested: _____
