

## Calgary Hospital Outpatient Lab Locations and Service Restrictions during COVID-19

Hospital Outpatient Laboratories are available to serve Ambulatory Clinic patients, immunocompromised patients and patients requiring special collections. Blood collection does not have to be on the same day as the Ambulatory Clinic visit. Services are available by physician / clinic referral only.

Acute Care site	Service	Type	Hours

### Definitions:

Ambulatory Clinic patient	Patients that receive medical service at a hospital on an outpatient basis.
Immunocompromised patient	Patients that are taking immunosuppressive drugs/treatment, experiencing illness/injury or have an inherited disease affecting the immune system.
Special collections	Samples that require special handling, are not available at PSCs, or can only be collected in hospital outpatient labs.
Referral	The formal process through which a health care provider arranges an appointment with another health care provider who provides specialist treatment or assessment.
