Re: **AMENDED:** Changes to Reference Intervals of **Sodium**, Chloride, Albumin, Total Protein, Calcium, **Total Bilirubin**, Alkaline Phosphatase, Phosphate, and Total CO2

PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

Key Message:

- Effective **October 22, 2019**, reference intervals for the following analytes will be updated to reflect the new provincial reference intervals (table attached):
 - **Sodium**
 - Chloride
 - Albumin
 - Total Protein
 - Calcium
 - Total Bilirubin
 - Alkaline Phosphatase
 - Phosphate
 - Total CO2
- There will be no critical value for Total CO2.

Why this is important:

- New provincial reference intervals are evidence-based and have been developed based on the statistics obtained on the local population

Action Required:

- Please be aware of the changes in reference intervals.

Background:

- The change in reference intervals is a part of standardization of the processes within APL South and North Sector.
