Re: Central Zone Seminal Fluid Requisition

PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

Key Messages:

- The collection information for Seminal Fluids, post vasectomy and fertility, have been standardized in Central Zone. A combined requisition and patient instruction sheet is available and is to be used, replacing and existing Patient Instruction forms as of November 9th

Why this is important:

- In 2014, Seminal Fluids were removed from the General Laboratory Requisition. A new requisition which includes the patient collection instructions was developed for use.

Action Required:

- Please discard any previous copies of Patient Instruction forms and begin using the new Central Zone Seminal Fluid Requisition:
 - The new requisition can be found on InSite at:
<http://www.albertahealthservices.ca/frm-19624.pdf>
- The new requisition is to be used effective November 23, 2015

Inquiries and feedback may be directed to:

- Lezlie Rein, Tech II Hematology, Red Deer
