Re: HIV and HCV Resistance Testing Results are Now Available in NetCare

PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

Key Messages:

- As of September 16, 2019, all HIV and HCV resistance testing results will be available in NetCare
- Results will additionally be sent to the ordering provider through routine reporting channels

Background:

- Previously, HIV and HCV resistance reports were only available by email or by mailing the hardcopy report to the ordering physician
- Physicians who may not have ordered the test, but were involved in treatment and care of the patient, would have to request the results from the laboratory, which would then be emailed/mailed to them

Actions Required:

- No action: after September 16, 2019, HIV and HCV resistance testing will be accessible through NetCare, and a Cerner report will be generated and sent through routine channels to the ordering physician

Inquiries and feedback may be directed to:

Dr. Carmen Charlton, Clinical Microbiologist ProvLab; (780) 407-8975;
