Re: West Nile Virus Diagnostic Testing – Update for 2015

PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

Key Message:

West Nile virus diagnostic testing commences June 1, 2015.

Why this is important:

- West Nile virus (WNV) acute diagnostic testing is available routinely from June 1 – October 31.
- WNV testing outside this time period is available only for those with a travel history in endemic areas.
- WNV testing will proceed in 2015 as in previous years, using nucleic acid amplification tests (NAATs) and serology (IgM, IgG and avidity testing).
- For CSF samples, testing for WNV is available June 1 – October 31 if it is clearly requested on the requisition.

Action Required:

The following documents will provide more detailed information:

- How to Interpret West Nile Virus Test Results 2012 update (no change in 2015)
- Arbovirus History Form

The above listed documents may be found under “West Nile Virus” at:

<http://www.albertahealthservices.ca/lab/Page14607.aspx> (ProvLab Education Page)

Inquiries and feedback may be directed to:

The Virologist On Call at

- Edmonton Site – Phone: 780-407-7121 or 780-407-8822 (ask for the Virologist On Call)
- Calgary Site – Phone: 403-944-1200 (ask for the Virologist On Call)
